Activate Care

Community
Coordination

Imagine if our healthcare system seamlessly coordinated care around all of our physical, behavioral, and social needs. With the Activate CareHub™, this is the new standard of care.

- **Panel Management**

  It's hard to stay in sync with the changing needs and requirements of a diverse panel. Care coordinators tell us the most powerful aspect of our Activate CareHub™ platform is the ability to understand who your active panel is, what patients you're working on, and what stage of the process they're in. It's designed to work the way you do.

- **Data Exchange**

  Combine the CareHub™ platform with the essential data you rely on every day. We work with the data you already use, wherever it comes from – healthcare, social services, or any other source. We make your data actionable in the context of individual patient needs, helping you scale interventions across populations.

- **Resource Management**

  Why stitch together data from clunky spreadsheets and other tools that can't keep up? Get a real-time overview of how people and teams are staffed across patient and panel needs, then easily reassign and reschedule tasks and rebalance work across your available resources.

- **Process Automation**

  Leverage your data to assign tasks, execute workflows, and trigger activities & events. The Activate CareHub™ is the single platform designed to automate process integration across healthcare & social services.

Established in 2013, Activate Care is a nationally- recognized provider of community-based care coordination technology. Activate Care has been selected by national and regional healthcare and social services organizations across the United States to seamlessly facilitate real-time, cross-sector collaboration around patients with complex health, behavioral, and social needs.

Imagine if our healthcare system seamlessly coordinated care around all of our physical, behavioral, and social needs. With Activate Care, this is the new standard of care. The Activate CareHub™ offers everything you need to manage high-quality care coordination programs linked to networks of community-based organizations. See why hundreds of organizations across the country trust Activate Care to help them address social determinants of health.

Your entire shared patient panel managed in one place

Understand which patients and clients comprise your active panel, what services they're receiving, and where they are in your care delivery processes.

Your processes and data aligned every step of the way

Manage your teams' tasks, care plans, and interventions more efficiently by leveraging integrations, automation, and data exchange.

Your care teams connected together across the community

Build cross-organizational teams within patient-centered care plans, enabling real-time communication and collaboration at the top of everyone's license.

Protected by industry-leading security & privacy measures

Powered by Activate Care's vetted and trusted technical infrastructure, designed specifically for health and social care coordination across the community.
